

## Guide to New Vendor Portal (ZSN) Registration, FAQ, and Category List

On May 15, 2018, DC Water launched a new e-Procurement tool and supplier portal Zycus Supplier Network (ZSN) to post solicitations, receive proposals, and make awards. These processes will be done entirely online in ZSN. You would not be able to view or participate in new solicitations if you are not registered in ZSN. Please follow the instruction below to register and view all our new solicitations. Also attached are Frequently Asked Questions (FAQ) and our Category List. More information can be found at [www.dewater.com/procurement](http://www.dewater.com/procurement).

### **Complete the registration of your company in ZSN by following these 2-steps:**

- Step 1:** Go to [www.dewater.com/procurement](http://www.dewater.com/procurement) and click on “New Vendor Portal” to start your registration
- Step 2:** **Activate your account and complete profile:**
- After registering, you will receive an e-mail notification prompting you to activate your account.
  - Complete your company profile once you login for the first time.
  - Select up to 7 categories of goods and services that your company. You will receive an automatic invitation when a new solicitation is issued for these categories. If you don't select any category, then you won't be invited to any new solicitations.

### **Go to your ZSN Homepage:**

- All new DC Water solicitations issued from May 15, 2018 will be shown in your dashboard.
- If this is your first time, please take a tour by clicking “Self-Training Material” under HELP menu.
- Select “DC Water” as customer.
- In the dashboard, click on solicitations to view.
- Click/choose “Respond” action to start your proposal submission process.
- You can stop/edit your responses until the closing time of solicitation. Even after you clicked SUBMIT button, you can still stop/edit/delete your response until the closing time.

For help, please email to:

- Technical issues: [tech-support@zycus.com](mailto:tech-support@zycus.com). (Please mention DC Water in your message.)
- General DC Water business/solicitation related questions: [Supplier.Portal@dewater.com](mailto:Supplier.Portal@dewater.com)

## **FREQUENTLY ASKED QUESTIONS**

### **Q. What is e-Procurement?**

A. e-Procurement or electronic procurement refers to the process of purchase and sale of goods or services through electronic methods, primarily the Internet. It is superior to the manual process (paper process) of procurement.

The main components of a DC Water Procurement suite are Vendor Portal, RFX/Bid Creation, Bid/Proposal Submission, Bid Opening and Evaluation, Vendor Selection and Finalization, Contract Execution, Vendor and Contract Management.

The manual procurement process is inefficient, lacks transparency, and less accessibility. The digitizing of the procurement process leads to simplified workflow. It also makes the process equally accessible for everyone.

Most people are already using e-Procurement in their daily lives and big examples are E-Bay and Amazon.

### **Q. Why is DC Water moving to e-Procurement?**

A. DC Water has been going through many transformations in the past few years. DC Water has invested billions of dollars in the new water processing and waste water treatment centers, infrastructures, and new billing system. DC Water Department of Procurement has also been going through a large transformation process. One of the transformation objectives is to upgrade its procurement technology to replace current inefficient paper process which often takes 6-12 months to complete a solicitation. Through this new e-Procurement technology, it will be much easier and faster to identify, contact, and invite all potential suppliers (must be registered) to the new opportunities, proposal/bid submission will be much simpler and faster, and evaluation and award will be much quicker (with the automatic scoring capabilities).

### **Q. What will DC Water purchase using e-Procurement?**

A. DC Water will purchase all goods and services and engineering/construction services through this new e-Procurement system. This list is shown in our Category List attached.

During the registration, you will be asked to select up to 7 categories of goods and services (including engineering and construction) from the list provided. This is a custom category list of all goods and services actually purchased by DC Water in the past 5 years. DC Water decided to create this custom list instead of using typical industry classification codes such as SIC, UNSPSC, NAICS, and eClass which are very long and difficult to find your correct goods and services because much of these codes are irrelevant to what DC Water purchases.

### **Q. What is Zycus?**

A. Zycus is an industry leading e-Procurement software. DC Water selected Zycus after a competitive solicitation process. For more information, please go to [www.zycus.com](http://www.zycus.com).

### **Q. What is Zycus Supplier Network (ZSN)?**

A. ZSN is the vendor portal portion of Zycus e-Procurement suite. The current DC Water vendor portal is over 10 years old and it only displays the information. ZSN is a new latest industry's best supplier

portal that can actively interact with suppliers, pushing new solicitations information to the registered suppliers even the suppliers are not logged in ZSN.

**Q. When would ZSN available?**

A. It will be available from May 15, 2018.

**Q. Would existing supplier portal be closed?**

A. Yes the existing portal will be closed on June 30, 2018 and will no longer be available after this date.

**Q. I am already doing business with DC Water, do I need to register?**

A. Yes, in order to receive solicitations of any size or type, you must have an account in the new vendor portal (ZSN). Only the registered suppliers in new vendor portal (ZSN) will receive an invitation to the new solicitation, view, and respond to the solicitations. Bid/proposal can only be submitted through ZSN. Unless stated otherwise in the solicitation, DC Water will not accept paper or email submissions of bids/proposals.

**Q. My company information is in the existing vendor portal. Will that information be transferred to the new vendor portal (ZSN)?**

A. No. You must re-register your company in ZSN. Your company information in the old vendor portal will not be automatically transferred to ZSN due to the compatibility issue.

**Q. How do I register in the new vendor portal (ZSN)?**

A. Please go to [www.dewater.com/procurement](http://www.dewater.com/procurement) and follow the instruction provided.

**Q. Will I use the new vendor portal (ZSN) to respond to an open solicitation that is currently on the DC Water website?**

A. No. Please follow the instructions in the solicitation.

**Q. Will DC Water continue to post new solicitations on the old vendor portal?**

A. Not after May 15, 2018.

**Q. How long will the list of open solicitations be available on the DC Water website?**

A. The old vendor portal which is scheduled to be removed after June 30, 2018. However, if there are any active solicitations with closing dates later than June 30, 2018, then DC Water will keep the old portal available until all active solicitations are closed.

Class	DC Water Category List
<p>Note: This category list represents all categories of goods and services and engineering and construction services that DC Water has purchased in the past 3-5 years. You can select up to 7 categories when registering in the new supplier portal (ZSN). <u>If you do not select any categories, you will not be invited to participate in the new solicitations.</u></p> <p>When there is a new solicitation for a particular category, <u>DC Water's new e-Procurement system will automatically notify all vendors who registered for that category.</u> For example, if your company selected "Automotive - Vehicle fueling service" as one of your category, the new solicitation for this category will automatically notify all suppliers who selected this category in our new supplier portal (ZSN).</p> <p>If you do not see a good or service that your company provides, then please select "All Others" within the applicable class. For an example, if your company provides a chemical that is not listed, then select "Chemicals - All Others". Our new e-Procurement will always also select and notify suppliers who selected "All-Others" within the class to assure all potential vendors are notified and invited to the new solicitation templates.</p> <p>If your company provides more than 7 distinct types of goods and services or your goods and services are not listed here, then please try the followings:</p> <ol style="list-style-type: none"> <li>1) Select "All-Others" from the class if available to reduce the number of category items that you are selecting. (For example, if your company provides over 30 types of water treatment chemical, just select "Chemicals - All Others" instead of selecting each chemical. You will automatically be invited to <u>any</u> chemical solicitations if you select this.)</li> <li>2) Email to <a href="mailto:Supplier.Portal@dcwater.com">Supplier.Portal@dcwater.com</a> with your request.</li> </ol>
